

Health Wellness Performance INSTITUTE

Merging medicine with personal empowerment

Greetings!

Thank you very much indeed for your request for further information regarding our 3-Month program.

The Health Wellness Performance Institute merges root cause medicine with health and wellness, edu-powerment, a powerful combination which significantly increases the chances of those suffering from chronic disease to not only reverse their current condition but to also prevent recurrence and to thrive going forward.

The program is conducted at the patient's home if they live in the Southern Suburbs of Cape Town and in nearby surrounding areas.

Patients living further away should make arrangements to be seen at a closer location.

- Home consultations are conducted weekly and take place over 2 to 3 hours depending on the situation.
- On-going communication via email, text messaging or telephonically occurs throughout the week following

Collection of Data

First set of data

After confirming participation in the program via payment a batch of forms is emailed to the patient for completion.

This provides us with the first set of data regarding the patient's condition.

Second set of data

Once we receive the completed forms we arrange a suitable time and day with the patient to conduct the first home consultation.

This provides us with the second set of data.

Third set of data

The third set of data is obtained via laboratory tests and other special investigations and tests.

All 3 sets of data are then analyzed and, based upon the findings, a Preliminary Treatment Recommendations Report is mailed to the patient.

Further Treatment Recommendation Reports are then provided regularly after this until the end of the 3-month period.

Should a patient wish to schedule an information session at their home before deciding on joining the program this will be arranged. The cost of this **hour-long** session is **R350** and is deductible from the program fee should the patient decide to participate. The cost of the program is **R5700 per month**.

The program is conducted by Dr Faiez Kirsten.
A copy of his profile with testimonials will be forwarded on request.
Also please see the accompanying testimonial.

Thank you once again.
And we hope to be of service to you!
All of the best
